BENCHES

Acting sustainably is what we do. With our beginnings in Australia, since 1984 we have been designing and manufacturing commercial furniture products and components for global work place environments. With sustainability at the core of everything we do, we are dedicated to the reduction of environmental impact from our products and actions.

FLUID

WORKPOINT SYSTEM

At **ThinkingWorks** we know that a better workplace helps the organisation to grow through productivity. And we know that the productivity in the workplace is measured by happiness and retention. So we are always thinking of products that will enhance the workplace and allow the users to work within a fluid environment.

FLUID six-person workbench
with accessories

FLUID four-person workbench
with touch down desk

FLUID is a workpoint system by **ThinkingWorks**. **FLUID** forms collaborative workbenches, desks and tables with a bold aesthetic and unique leg profile, making it stand out from a traditional bench-style workpoint. Each workspace can be configured with storage, power and screen accessories to suit the individual worker's needs. Touch down desks can be integrated into workbench design for mobile workers.

FLUID two-person single sided desk

ThinkingWorks likes to think about the living office as well as the action office. We like to make sure that a workplace uses space efficiently to provide the flexibility required for various tasks and work requirements. **FLUID** can be configured in a number of simple ways to maintain consistency throughout the workplace with one product and one aesthetic. This allows for reconfiguration, re-use and recycling as the workplace evolves.

- ▶ The **CASINO** mobile caddy unit further enhances the flexibility of the workspace and can easily travel to any workpoint with the user for a flexible activity work environment.
- ▶ The **CME** monitor arm fits neatly onto the accessory rail to support screens and laptop trays.
